

I am W4NI. I have been involved in giving amateur exams on a quarterly basis for seventeen years. I have proctored literally hundreds of exams. We regularly allow retests if a candidate makes a barely failing grade, allowing many candidates to pass on a retest. This request RM-10809 would force those 'near miss' candidates to wait 30 days. There is no basis for that delay.

The FCC should dismiss this proposal. RM-10811 is preferable.
